Open Spaces 2019
Endless paths, endless openness, endless possibilities – all this lies before you when you get on a Riese & Müller E-Bike.

Get a taste for this feeling of boundless freedom with our Lookbook. Immerse yourself in the world of our models, find the right E-Bike just for you, as well as all the important details and prices.

We would be delighted to take you on an online trip and offer you immensely more information about our products at www.r-m.de. Our specialist dealers are at your disposal for test rides and one-to-one advice.

#gofurther
The Rider-centric Experience (RX) is always paramount.

Since 1993, Riese & Müller has placed riders and their needs at the heart of every development. To improve the riding experience beyond the product, we are expanding our portfolio with pioneering networking and digital services. This will make our E-Bikes even more useful and enjoyable for everyday life. The Rider-centric Experience (RX) is always paramount – so that riders can concentrate fully on the unique riding dynamics.
Your smartphone becomes an on-board computer.

With COBI.bike sport** we are bringing all the power of the smartphone to the E-Bike: from ingenious bicycle navigation and telephone functions to fitness tracking and live weather updates. Your smartphone becomes a powerful on-board computer – motor control included. We are adding exclusive features to the Cobi app with additional customised modules.

** Available for Delite, Homage, Culture GT, Supercharger, Charger, Nevo GT/GH/GX, Load, Packster, but not for the Delite GTS, rohloff and HS models and in combination with ABS.
The digital home for your e-bike.

With the new production status, our customers can check when their bike is being hand made and they are kept informed of any changes to the delivery dates. When you order your ideal bike from the dealer, you'll receive a bike code that can be entered on r-m.de to find out the exact production date.

Register your new Riese & Müller bike after purchase on r-m.de for our free warranty extension.
Just ride wherever and as far as you want. Simply take with you whoever or whatever you want. With large cargo or small children, but above all always with vitality and safety. This is precisely the feeling that the E-Bikes and E-Cargo-Bikes from Riese & Müller convey the most.
Delite

The Delite is available in three frame heights all with 27.5" wheels for perfect handling. The Control Technology with full suspension provides the best traction, the optional ABS provides maximum safety and with DualBattery Technology as standard it provides an even greater range.

Notes:

² For trailer options, please refer to the manufacturer's specifications.
³ The children seat approval is subject to local regulations and certifications.
Nevo

The striking silhouette of the Nevo, the expansive frame profile and hard edges promise sportiness and determination. In addition to its athletic, clean-cut design, the Nevo impresses with its agile riding behaviour and safe handling.

Nevo
Roadster

The roadster perfectly combines the riding feel and aesthetics of a classic racing bike. Thanks to a high level of frame stability, the short stem and optimum weight distribution, the bike always remains extremely agile and handles perfectly.

Cruiser

The sophisticated colour combination of the frame, saddle and 28" tires, together with the subtle brown leather-look is eye-catching and makes your Cruiser a real bright spot on the road. You'll love being on the bike for a couple of extra laps when you're so stylish and relaxed.

Swing

The sensitive suspension fork and the suspension seatpost, the smooth-running wheels and the pleasant assistance from the Bosch drives make riding on the Swing feel like floating.

Packster 60/80

Spontaneous family outing, weekly shopping and frequent rider changes: the Packster 60 is extraordinarily variable and spacious. Its cargo space is large enough to fit two children and the rapid height adjustment of saddle and handlebar means the Packster 60 can be adapted to almost any body size.

No matter what you want to transport with the Packster 80, with a loading length of 80 cm you can fit just about everything in. The Packster 80 remains easy to handle and its high stability impresses in city traffic.

- Carrier
  Enables a pannier to be fitted
  (standard equipment with HS models)

  Additional chain for 130 cm lock
  including chain bag for Packster

  For use with the Box or Carry System, enhances the standard frame lock

Technical approvals
Gross vehicle weight capacity: 200 kg
Carrier: 20 kg
Handlebar bag, basket: –
Trailer approved singletrack: –
Trailer approved dualtrack: yes
Bike-trailer approved: –
Children seat approved: yes

Birdy

The Birdy is a Swiss pocket knife that you can mount and ride away on. With full suspension. Its cleverly thought-out frame, with no hinge joint in the main frame, and the adapted gear ratio deliver a riding experience just like any normal bike.

## Specifications

- universal
- cyan
- lime
- white
- graphite matt

### Optional equipment:

- comfort
- carrier, Lowrider
- sport
**Birdy city**
- Leading link front suspension fork
- Birdy-elastomer
- Shimano Nexus, 8-speed
- Shimano Deore
- Schwalbe Big Apple 50-355 Reflex
- Supernova E3 Pure 3S
- 12.9 kg
- 2.37–7.27 m

**Birdy touring**
- Leading link front suspension fork
- Birdy-elastomer
- Shimano Deore, 10-speed
- Shimano Deore
- Schwalbe Marathon Racer 40-355
- Supernova E3 Pure 3S
- 10.9 kg
- 2.19–7.80 m

**Birdy rohloff**
- Leading link front suspension fork
- Birdy-elastomer
- Rohloff Speedhub, 14-speed
- Shimano Deore
- Schwalbe Big Apple 50-355 Reflex
- Supernova E3 Pure 3S
- 13.1 kg
- 1.50–8.02 m

### Optional equipment
- Sport or Comfort stem, adjustable height, Can be selected at no surcharge
- Carrier
  - Suitable for use with panniers
- Lowrider
  - Includes inline rollers for the carrier (Birdy can be pulled on the lowrider)
  - Pannier bracket for handlebar
    - Includes KLICKfix handlebar adapter, lockable (cannot be factory configured)
- Supernova lighting with hub dynamo
  - For Birdy touring (standard equipment with all other models)

- Abus Bordo 90 cm folding lock
- Perfect for use with Birdy, thanks to the longer Velcro straps
- SKS Spaero Sport air pump, Deep Black
- Modified for Birdy, fits into the seatpost
- MKS Ezy Promenade detachable pedals
  - Quickly and easily removed
  - (cannot be factory configured)
- Protective cover
  - Durable nylon
  - (cannot be factory configured)
- Frame bag
  - Fits under the top tube
  - (cannot be factory configured)

- Rear elastomer yellow/green
- Yellow = soft, Green = harder
- (cannot be factory configured)

- Front shock absorber, harder
- Harder fork elastomer
- (cannot be factory configured)

### Technical approvals
- Gross vehicle weight capacity: 120 kg
- Carrier: 15 kg
- Handlebar bag, basket: 3 kg
- Trailer approved singletrack: –
- Trailer approved dualtrack: yes
- Bike-trailer approved: –
- Children seat approved: –

Technology by Riese & Müller

Every Riese & Müller bike represents a precisely thought out concept to suit a specific purpose, born out of our passion and unique approach.

We strive for perfection, aspire to innovation and embrace experimentation – at all times and down to the last detail. To us this is the only way to create the powerful riding experience that characterises every Riese & Müller bike.
The active rear swing arm, optimised front wheel suspension and the co-sprung luggage carrier make up the core of the models that have been developed based on the Riese & Müller Control Technology. These are the Homage, Culture, Delite and Load.

The Control Technology ensures increased road holding and maximum safety at high speeds, during sporty rides and much improved traction in tricky situations. Vibrations and hard knocks like those experienced on cobbles or kerbs are simply smoothed out. Your luggage is also protected by the co-sprung luggage carrier. Since it is securely attached to the main frame, your luggage is cushioned too. This increases riding safety and road holding, even with heavy loads. The Control Technology’s suspension system responds with extreme sensitivity, offering top-class suspension comfort.

The result is powerful propulsion and sporty riding without any loss of energy.

Bosch’s eBike ABS is another component employed by Riese & Müller to complement the successful Control Technology, thereby increasing the safety and riding dynamics of its E-Bikes.** This new development uses an intelligent system to prevent the front wheel from locking and to limit lifting of the rear wheel. This reduces the braking distance and the risk of going over the front wheel or toppling over.

**ABS is available throughout Europe for the Homage GT and Delite GT, but not for Delite GTS, mountain and rohloff models and not in combination with Fox components and Cobi.
**DualBattery**

Riese & Müller is one of the first companies to integrate two 500 Wh batteries into a new E-Bike concept – DualBattery Technology – thereby combining a sporty riding experience with unbeatable range.

All models with optional DualBattery Technology include two batteries on the frame in such a way that they are harmoniously integrated into the lines and assist the riding behaviour of our bikes. While riding, the batteries alternate. The system automatically tracks the charge states of both batteries and switches between them when it detects a charge difference of five percent. This ensures that both batteries are used in an equal manner. If necessary, riders also have the option to use just one battery. In this case, it doesn’t matter which unit the battery is attached to. The batteries are charged directly on the bike or external by the same charger.

The DualBattery Technology means there is almost no limit to the distance of a ride. For short trips and in day-to-day use, the technology offers a real boost in convenience as it requires significantly less frequent charging. Basically: Twice the batteries. Twice the range. Twice the freedom.

**Integration**

By fully integrating a Bosch PowerTube battery into the E-Bike frame, we are setting new standards. Following the success of the Charger and Supercharger, now the Nevo, the Homage and the Culture also impress with a highly functional, sporty and above all integrated design.

The frame structure is cast in one piece because the Bosch PowerTube batteries are fully integrated into the down tube. The Supercharger is equipped with DualBattery Technology as standard. The second Bosch PowerTube is integrated in the top tube. When it needs to be charged the battery can be quickly removed or charged directly on the bike. Plastic covers enclose the batteries when riding and protect the internals from moisture and stone chips.
Gear
Whatever your plans and your expectations, you will find the perfect gear among the Riese & Müller E-Bikes. The comfortable hub gears and sporty derailleur gears together make up a broad and very customisable range of equipment.

For sporty riders, our touring, mountain and light E-Bike models are fitted with a 10- or 11-speed Shimano derailleur gear. All vario models from Riese & Müller are equipped with the continuous Enviolo 380 hub gear, allowing you to always ride in the perfect gear without any gaps between shifts. The automatic models feature the automatic Enviolo H-Sync 380 hub gear. Our city and urban E-Bike models (excluding the Roadster) are equipped with the Shimano Nexus 8-speed hub gear with coasting. The city back-pedal models have the same gear, but with back-pedal brake.

Some models are equipped with electronic gears. Two versions from Shimano are used, the XTR Di2 derailleur gear on the Delite GTS and the Alfine Di2 hub gear on the Roadster urban and Roadster GT urban. The name stands for Digital Integrated Intelligence: gears are changed simply electronically and accurately by the push of a button and entirely without mechanical cables. One new feature is that all E-Bike models with Rohloff hubs are equipped with electronic Rohloff E14 gears. This links the mechanical Rohloff Speedhub 14-speed gear hub to the eShift function of the Bosch E-Bike system – an electronic gear shift activation unit.

Bosch System
Reliable, performance-oriented and innovative – these are the standards to which we hold our E-Bikes, as well as all components and especially the drive system. That's why all Riese & Müller E-Bikes are equipped with the industry-leading Bosch drive system. As a close partner, we are collaborating to constantly enhance the system further.

The Bosch Active and Performance line motors provide impressively powerful drives and are among the most reliable on the market. With pedal assistance of up to 25 km/h, and up to 45 km/h on our HS models, you can reach any destination effortlessly.

Our E-Bikes are powered by state-of-the-art Bosch lithium-ion batteries with a capacity of 500 Wh. The battery capacity of 1,000 Wh is achieved by means of DualBattery Technology with two batteries used in parallel.
Equipment
By constantly testing our bikes in various ways, we are able to optimise the features they offer too. There is a customised equipment option to suit every purpose ensuring that our bikes meet our expectations in terms of innovation.

Our equipment range extends from smart solutions for hooking up and locking the bike (Abus Bordo Plus folding lock and Abus Bordo Alarm, integrated cable lock and frame lock with optional chain lock), to versatile transport options such as child seats, boxes and covers for our E-Cargo bikes, to high-quality suspension forks and components from Fox.
Displays
The control centres of Riese & Müller E-Bikes are their Bosch displays. Depending on the model, our E-Bikes are equipped with the proven Intuvia or Purion display as standard. The Purion's sleek design bundles all relevant information on a small, easy-to-read display.

The Purion is highly efficient, lightweight and trimmed down to the essentials. For selected models the new Bosch Kiox is available as an option. The scratch-resistant Kiox colour screen is easy to read in intense sunlight, while the magnetic holder ensures simple handling.

The ultra-modern Kiox is small, robust, compact and ready for the E-Bike future.

COBI.bike sport turns your smartphone into an on-board computer. Using the Cobi app and the docking station (Cobi Hub), your smartphone connects with the E-Bike – and immediately you can use many convenient functions: smart navigation, cycling weather, alarm system and much more.
**Nomenclature**

GT "Gran Turismo"
Comfortable E-Bike riding. Perfect on tarmac or light terrain for day-to-day riding, touring and travelling.

GX
Pure riding fun in light terrain with gravel, sand and dirt tracks. Also suitable for all-round and road riding.

GH
In GH models all components at the contact points are even more stable and designed for a permissible total weight of 160 kg. An E-Bike for every situation and rider.

**Statutory liability and warranty**

Limited warranty: The limited warranty period for your E-Bike is two years starting from the date you collect your E-Bike from your dealer. Although we adhere to the freedom from defects of all components for two years, some components are subject to wear due to their function and must be replaced when their wear limit is reached. Essentially this includes all components of the drivetrain (chain, sprockets, chainwheel, belt), the gear cables, the brake pads, discs and rims, the tires and the rubber grips. These wearing parts are not covered by the limited warranty for defects. Furthermore, the battery (battery cells) of your E-Bike is also subject to wear; in this case special operating and maintenance instructions must be observed.

Warranty: Notwithstanding the regular warranty for defects, we grant you a five-year warranty for frame failure for all E-Bike models according to our warranty conditions. Furthermore, we grant you a voluntary warranty on the battery of two years: we guarantee that the battery will still have a capacity of 60% after two years or 500 charge cycles (whichever occurs first).

All warranty promises relate to private customers at initial purchase.

**Technical approvals (footer)**

1. Maximum rider weight: 115 kg.
2. For HS-models it is only allowed to transport children in children seats and not in a trailer. For HS-models an approved trailer hitch is necessary. Attention: At this time we are unaware of a trailer with an approved trailer hitch.
3. First figure: HS models
4. All GH models: Maximum cyclist weight: 125 kg, gross vehicle weight capacity: 160 kg
5. Maximum weight of 15 kg for child seats for carrier mounting. Not allowed are sharp-edged metal clamps and deformation due to excessive clamping forces.

This brochure is made of 100% recycled paper which has been certified with the Blue Angel (Blauer Engel) ecolabel. It is particularly low in harmful substances and conserves natural resources. In printing this brochure, environmentally friendly inks were used and any ensuing CO₂ emissions compensated for via environmental protection projects.
